Education

University of Warwick (QS: 48), Master of Programme and Project Management Coventry, UK | Sep 2025 – Sep 2026

Major Coursework: Project Planning, Management and Control, Organisations, People and Performance, Project Financial Management, Change Management, Management of Multi-Project and Programme Environments;

University of Sheffield (QS: 66)

Sheffield, UK | Sep 2021 – Jun 2025

Bachelor of Arts in Accounting, Finance and Management

Major Coursework: Management Accounting, Financial Accounting, Company Analysis and Management, Applied Accounting and Financial Management, Case Studies in Accounting and Consulting;

Honors & Awards: University of Sheffield Scholarship, 2021;

AI Product Development & Content Creation

AI Applications & Content Creation: Leveraged AI tools to deliver a personal website and multiple web projects, covering requirements definition, UI design, feature development and iterative improvement; independently built a reminder application with real-time daily notifications. Operate a supply chain and manufacturing video account with over 100,000 followers, leading topic planning, scripting, content production, performance review and operational optimisation.

Internship Experience

Xiaomi, Product Management, Intern

Coventry, UK | Apr 2026 – Jul 2026

- **Analytical Framework & Strategic Assessment:** Led the design of an automotive aftermarket service package and built a comprehensive research framework spanning market-entry analysis, competitor benchmarking, service-offering analysis, product tiering and process design; evaluated market size, profit pools and competitive dynamics, benchmarked BYD's after-sales model, developed an "integrated after-sales service ecosystem" recommendation and delivered a complete product design report to support the market-entry decision;
- **Competitive Benchmarking & Service Analysis:** Catalogued owner benefits across 19 automotive brands in six dimensions, including warranties, vehicle pickup and delivery, and roadside assistance, creating a structured competitor database; conducted an in-depth review of Land Rover, Ford, Lincoln and NIO across six stages—trigger, access, dispatch, on-site resolution, onward mobility and post-incident support—identifying 32 service innovations and developing a reusable product-design framework;
- **Data Model & Service Tiering:** Built a two-dimensional "usage frequency-customer-perceived value" assessment model and classified 40 services into four quadrants; designed tiered service packages combining foundational coverage, high-frequency touchpoints and high-value contingency support, benchmarked NIO and XPeng pricing approaches, and defined benefit boundaries and trigger conditions to produce an implementation-ready product proposal;
- **End-to-End Process Design & Delivery:** Developed an end-to-end swimlane workflow for car-wash and detailing services, assigning six stakeholder roles and mapping appointment booking, two arrival pathways and status updates; designed dual vehicle inspections, verification-code handoff and real-time location tracking as key controls, establishing a complete order-to-delivery workflow that provided the operating basis for detailed SOPs and system requirements;

PwC, Strategy & Management Consulting, Intern

Coventry, UK | Jan 2026 – Apr 2026

- **Engagement Framework:** Led a feasibility assessment for entering China's new-style tea beverage market, developing a research framework from macro indicators (1.41 billion population and disposable income per capita above RMB 40,000) to micro-level economics (store-level profitability model), and delivered a complete analysis report to support the client's market-entry decision;
- **Business Analysis:** Built a three-layer "product-consumption occasion-competitor" model and applied Porter's Five Forces to identify supply-chain depth and digital operations as two key barriers; evaluated four operating models—company-owned/joint operation/franchise/acquisition—and developed three entry options; benchmarked leading brands including Nayuki, Mixue and Guming to recommend a differentiated market-entry strategy;
- **Financial Modeling:** Built a store-level profitability model, estimating capital expenditure of RMB 300,000–500,000 and cost structure (raw materials 35–40%, rent and labor 15–20% each), and projected a 12–18-month payback period; quantified the labor-cost impact of automated tea-brewing equipment (15–20% of costs), providing data-driven support for cost optimization and business model design;
- **Key Findings:** Identified health-focused offerings (zero additives, fresh milk) as the minimum requirement for market entry and upstream price-locking and cold-chain capabilities as critical success factors; completed the feasibility assessment using annual reports, industry research and official statistics, quantifying the effects of delivery-platform commissions (approximately 10%) and wastage volatility on net profit to support profitability forecasts and the client's entry evaluation;

CITIC Securities, Investment Analysis, Intern

Hangzhou, China | May 2024 – Jul 2024

- **Industry Research:** Analyzed industry and listed-company data, supported the preparation of daily/weekly updates and in-depth research reports, and distilled industry trends and investment theses;
- **Financial Analysis:** Reviewed the three primary financial statements of listed companies and used Excel for data modeling and visualization, improving analysis efficiency and supporting investment decisions;

- **Research Support:** Consolidated field-research and conference-call notes, extracted key information and produced structured analyses to support investment decisions;
- **Professional Development:** Researched fiscal and tax policies affecting the securities industry, assessed their implications for financial operations, and strengthened data processing, modeling and report-writing capabilities;

China Everbright Bank, Relationship Management, Intern

Harbin, China | Apr 2023 – Jul 2023

- **Product Sales:** Assessed client asset structures and risk preferences, matched clients with wealth-management and fund products, and provided asset-allocation recommendations to more than 100 clients; helped convert client funds into RMB 200,000 in new deposits, increasing client assets and improving deposit retention;
- **Operations Support:** Collected pre-loan documentation, conducted preliminary risk reviews and tracked approval workflows to support compliant business execution; maintained client relationships and supported marketing campaigns, improving client conversion and business development; resolved client complaints and streamlined communication processes, increasing customer satisfaction by 65% and earning recognition from the business team;

Campus Experience

Red Cross Society, Internal Relations Department Member

Sheffield, UK | Sep 2021 – Jun 2025

- Coordinated departmental activity planning, task allocation and cross-functional collaboration to keep operations on schedule; supported first-aider certification assessment design and on-site proctoring, strengthening process consistency; planned HIV/AIDS prevention and anti-discrimination initiatives, developing proposals, promotional materials and venue arrangements;

Sheffield Chinese Students and Scholars Association, Head of External Affairs

Sheffield, UK | Sep 2021 – Jun 2025

- Led annual public-service and charity initiatives, strengthening the association's service role and member engagement; served as a liaison among students, the university and the Chinese Consulate-General in Manchester, helping address community needs; planned and launched an alumni association and built a platform connecting current students with alumni, contributing to the association's repeated recognition as the "Best Student Association in the UK";

Skills

Languages: Mandarin Chinese (Native), English (Fluent; Professional Working Proficiency);

Accounting Software: Proficient in Kingdee, Yonyou, SAP and other mainstream finance systems, with the ability to process bookkeeping, financial reporting and tax filings efficiently;

Office Software: Advanced Excel (PivotTables, VLOOKUP and macros), proficient in Word and PowerPoint.
